Account History & Compliance Notes

Reference: EU-A-A1-000010 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The licensing relationship was established as part of a broader enterprise agreement covering multiple subsidiaries. The OmegaSolutions entity was carved out as a standalone license holder at the request of their group legal counsel, who sought to isolate liability at the operating entity level rather than the holding company. This structure required additional KYC documentation and a supplementary counterparty risk assessment.

The product team has been the primary user base since initial deployment, with occasional cross-departmental access granted on an ad-hoc basis by the client's internal IT administrator. The compliance team has repeatedly noted the absence of a formal internal user provisioning process at the client side, which creates tracking difficulties and was cited as a control weakness in the last two consecutive audit cycles.

The most recent audit returned a minor failure rating primarily due to incomplete documentation of the sub-processor register. Several vendors listed in the client's data processing agreements were absent from the register submitted to the compliance portal, a discrepancy attributed to an administrative oversight during a recent procurement cycle. The client committed to remediation and provided an updated register within the stipulated timeframe.

This is one of the longer-standing active accounts in the portfolio, having maintained continuous compliance status since initial onboarding. The OmegaSolutions team has proactively engaged with compliance training resources provided and has on two occasions served as a positive reference for the onboarding of new licensees within their industry sector.
