Account History & Compliance Notes

Reference: EU-A-A1-000049 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

This client relationship originated from an inbound request submitted via the partner portal in 2022. The legal onboarding process took approximately eleven weeks due to prolonged negotiations over data processing addenda, particularly around sub-processor disclosure obligations and the scope of the audit rights clause. Several rounds of redlines were exchanged before a mutually acceptable version of the data processing agreement was finalised.

Usage logs obtained during the Q2 2025 compliance review indicated that the integration layer was being accessed by a third-party contractor engaged by NovaIndustries, which was not disclosed as a permitted sub-user in the original agreement. The client was notified via formal letter and subsequently provided written confirmation that the contractor access had been terminated and access credentials revoked.

While the overall audit outcome was satisfactory, the review panel noted that several recommended security hardening measures from the previous cycle had not been fully implemented. The client attributed the delay to an internal IT resource constraint arising from a parallel infrastructure migration. A revised implementation timeline was accepted and is subject to verification at the next scheduled review.

The software deployment is operating on a version that is approaching end-of-support status. The client has been formally notified and has indicated an intention to plan the upgrade within the next scheduled maintenance window. This item is tracked in the account risk register and will be verified at the next scheduled technical check-in.

From a commercial perspective, the account has historically maintained a good payment record, with the exception of a brief late-payment episode in 2022 that was attributed to a treasury system transition at NovaIndustries. A late payment charge was waived as a goodwill gesture given the client's otherwise clean financial history with the organisation.
