Expiration Date	2021-04-07
Postal Code	83686

Account History & Compliance Notes

Reference: EU-A-A2-000061 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

Initial contact was made through the regional sales team following attendance at an industry conference. The prospect expressed specific interest in the analytics module, and the license scope was deliberately narrowed during negotiations to exclude certain data export functionalities that raised regulatory concerns in the client's jurisdiction. Legal sign-off from the client's privacy counsel was a condition precedent to execution.

Usage logs obtained during the Q1 2024 compliance review indicated that the integration layer was being accessed by a third-party contractor engaged by OmegaHub, which was not disclosed as a permitted sub-user in the original agreement. The client was notified via formal letter and subsequently provided written confirmation that the contractor access had been terminated and access credentials revoked.

The most recent audit returned a minor failure rating primarily due to incomplete documentation of the sub-processor register. Several vendors listed in the client's data processing agreements were absent from the register submitted to the compliance portal, a discrepancy attributed to an administrative oversight during a recent procurement cycle. The client committed to remediation and provided an updated register within the stipulated timeframe.

The license reached its contractual expiry date without renewal, despite three formal renewal notices issued at 90, 60, and 30 days prior to expiry. Internal records indicate that the client's procurement team initiated a renewal process but encountered internal budget approval delays that could not be resolved within the required timeframe. Post-expiry access has been blocked per standard operational procedure.

The software deployment is operating on a version that is approaching end-of-support status. The client has been formally notified and has indicated an intention to plan the upgrade within the next scheduled maintenance window. This item is tracked in the account risk register and will be verified at the next scheduled technical check-in.
