Contact Name	Barbara Thompson
Renewal Frequency	Biennial

Account History & Compliance Notes

Reference: EU-A-A3-000135 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The account was migrated from a legacy reseller arrangement in 2023 when the original distribution partner ceased operations. The transition was managed by the regional partner success team and involved re-signing the master license agreement with updated data processing terms. Several weeks of parallel access were provided to allow the client to verify continuity of service before the legacy arrangement was formally terminated.

Internal telemetry data reviewed under the technical audit clause showed that the software was being accessed from departmental units not originally specified in the license schedule. While the total user count remained within contractual limits, the undisclosed departmental deployment was documented in the compliance memorandum dated 2021-02-19 but not formally escalated given the overall low-risk profile of the account.

Invoice disputes have been minimal throughout the relationship. A single billing discrepancy was raised relating to pro-rated charges following a mid-cycle seat adjustment request. The matter was resolved promptly following clarification from the finance team, and no further disputes have been recorded.

The compliance team recommends maintaining the current monitoring frequency for this account and scheduling a structured review meeting with the client's compliance function to address the outstanding items. A detailed remediation tracking log should be maintained by the assigned compliance officer until all open points are formally closed.
