Account History & Compliance Notes

Reference: EU-A-A3-000109 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The account was originally onboarded through a referral from a direct inbound inquiry, following a competitive procurement process in which three other vendors were evaluated. The initial engagement was preceded by a four-month pilot programme limited to the it team, during which the licensee demonstrated satisfactory technical integration capabilities and a genuine commitment to compliance onboarding requirements.

Utilisation patterns reviewed during the annual 2023 audit revealed that actual seat consumption peaked at 65 concurrent users, significantly below the 100 seats contracted. The compliance team flagged this underutilisation in their quarterly review report and recommended initiating a commercial renegotiation to right-size the license, though the account manager advised against it given the client's stated expansion plans for the following fiscal year.

From a technical standpoint, the deployment has been stable with no major service incidents reported to the support function. The client completed the mandatory security configuration review within the required timeframe and holds a current penetration test certificate on file. Integration with their existing identity management infrastructure was completed without material issues.

Minor non-conformances identified during the most recent review included out-of-date contact information in the legal notice register and a delay in notifying the compliance team of a personnel change in the data protection function. Neither issue was considered material in isolation, but the recurrence of administrative lapses across multiple audit cycles has been formally noted as a concern.

The compliance committee has recommended that the next renewal cycle incorporate a requirement for the client to designate a dedicated internal compliance liaison with defined responsibilities for this account. This expectation has been communicated informally to the client's legal team and received a positive initial response.
