## Account History & Compliance Notes

Reference: EU-A-A4-000167 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

This client relationship originated from an inbound request submitted via the partner portal in 2022. The legal onboarding process took approximately eleven weeks due to prolonged negotiations over data processing addenda, particularly around sub-processor disclosure obligations and the scope of the audit rights clause. Several rounds of redlines were exchanged before a mutually acceptable version of the data processing agreement was finalised.

Utilisation patterns reviewed during the H1 2024 audit revealed that actual seat consumption peaked at 94 concurrent users, significantly below the 100 seats contracted. The compliance team flagged this underutilisation in their quarterly review report and recommended initiating a commercial renegotiation to right-size the license, though the account manager advised against it given the client's stated expansion plans for the following fiscal year.

A major audit failure was recorded following the discovery that SmartPlatform had been processing data in a jurisdiction not covered by the approved data residency declaration. The transfer was traced to a misconfigured cloud storage configuration that had been routing backup snapshots outside the agreed perimeter since 2022-12-11. The incident was self-reported by the client's IT security team, which was noted as a mitigating factor, though the materiality of the breach required escalation to senior compliance leadership.

From a technical standpoint, the deployment has been stable with no major service incidents reported to the support function. The client completed the mandatory security configuration review within the required timeframe and holds a current penetration test certificate on file. Integration with their existing identity management infrastructure was completed without material issues.

This is one of the longer-standing active accounts in the portfolio, having maintained continuous compliance status since initial onboarding. The SmartPlatform team has proactively engaged with compliance training resources provided and has on two occasions served as a positive reference for the onboarding of new licensees within their industry sector.
