Account History & Compliance Notes

Reference: EU-A-A3-000128 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The account was originally onboarded through a referral from a trade association contact, following a competitive procurement process in which three other vendors were evaluated. The initial engagement was preceded by a four-month pilot programme limited to the r&d team, during which the licensee demonstrated satisfactory technical integration capabilities and a genuine commitment to compliance onboarding requirements.

Utilisation patterns reviewed during the Q1 2024 audit revealed that actual seat consumption peaked at 345 concurrent users, significantly below the 500 seats contracted. The compliance team flagged this underutilisation in their quarterly review report and recommended initiating a commercial renegotiation to right-size the license, though the account manager advised against it given the client's stated expansion plans for the following fiscal year.

Technical support interactions have been moderate in volume, primarily relating to API rate configuration and user provisioning workflows. No severity-one incidents have been logged against this account during the current contract period. The client's technical team has been responsive to security advisories and has applied critical patches within the recommended remediation windows.

While the overall audit outcome was satisfactory, the review panel noted that several recommended security hardening measures from the previous cycle had not been fully implemented. The client attributed the delay to an internal IT resource constraint arising from a parallel infrastructure migration. A revised implementation timeline was accepted and is subject to verification at the next scheduled review.

The account is subject to an enterprise pricing agreement that was last formally benchmarked against market rates in 2022. Given the client's growth trajectory and changes in the competitive landscape, a commercial review has been flagged as a priority item for the next account management planning cycle.
