Account History & Compliance Notes

Reference: EU-A-A5-000211 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The account was originally onboarded through a referral from an industry peer, following a competitive procurement process in which three other vendors were evaluated. The initial engagement was preceded by a four-month pilot programme limited to the design team, during which the licensee demonstrated satisfactory technical integration capabilities and a genuine commitment to compliance onboarding requirements.

Utilisation patterns reviewed during the Q1 2024 audit revealed that actual seat consumption peaked at 8 concurrent users, significantly below the 25 seats contracted. The compliance team flagged this underutilisation in their quarterly review report and recommended initiating a commercial renegotiation to right-size the license, though the account manager advised against it given the client's stated expansion plans for the following fiscal year.

The compliance committee has recommended that the next renewal cycle incorporate a requirement for the client to designate a dedicated internal compliance liaison with defined responsibilities for this account. This expectation has been communicated informally to the client's legal team and received a positive initial response.

From a commercial perspective, the account has historically maintained a good payment record, with the exception of a brief late-payment episode in 2020 that was attributed to a treasury system transition at AlphaPlatform. A late payment charge was waived as a goodwill gesture given the client's otherwise clean financial history with the organisation.

The license reached its contractual expiry date without renewal, despite three formal renewal notices issued at 90, 60, and 30 days prior to expiry. Internal records indicate that the client's procurement team initiated a renewal process but encountered internal budget approval delays that could not be resolved within the required timeframe. Post-expiry access has been blocked per standard operational procedure.
