Account History & Compliance Notes

Reference: EU-A-A6-000287 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

This client relationship originated from an inbound request submitted via the partner portal in 2024. The legal onboarding process took approximately eleven weeks due to prolonged negotiations over data processing addenda, particularly around sub-processor disclosure obligations and the scope of the audit rights clause. Several rounds of redlines were exchanged before a mutually acceptable version of the data processing agreement was finalised.

Usage logs obtained during the Q3 2024 compliance review indicated that the integration layer was being accessed by a third-party contractor engaged by DataGroup, which was not disclosed as a permitted sub-user in the original agreement. The client was notified via formal letter and subsequently provided written confirmation that the contractor access had been terminated and access credentials revoked.

Minor non-conformances identified during the most recent review included out-of-date contact information in the legal notice register and a delay in notifying the compliance team of a personnel change in the data protection function. Neither issue was considered material in isolation, but the recurrence of administrative lapses across multiple audit cycles has been formally noted as a concern.

The account is subject to an enterprise pricing agreement that was last formally benchmarked against market rates in 2024. Given the client's growth trajectory and changes in the competitive landscape, a commercial review has been flagged as a priority item for the next account management planning cycle.
