Account History & Compliance Notes

Reference: EU-A-A4-000178 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

Initial contact was made through the regional sales team following attendance at an industry conference. The prospect expressed specific interest in the analytics module, and the license scope was deliberately narrowed during negotiations to exclude certain data export functionalities that raised regulatory concerns in the client's jurisdiction. Legal sign-off from the client's privacy counsel was a condition precedent to execution.

The design team has been the primary user base since initial deployment, with occasional cross-departmental access granted on an ad-hoc basis by the client's internal IT administrator. The compliance team has repeatedly noted the absence of a formal internal user provisioning process at the client side, which creates tracking difficulties and was cited as a control weakness in the last two consecutive audit cycles.

This is one of the longer-standing active accounts in the portfolio, having maintained continuous compliance status since initial onboarding. The SmartGlobal team has proactively engaged with compliance training resources provided and has on two occasions served as a positive reference for the onboarding of new licensees within their industry sector.

The compliance team recommends maintaining the current monitoring frequency for this account and scheduling a structured review meeting with the client's compliance function to address the outstanding items. A detailed remediation tracking log should be maintained by the assigned compliance officer until all open points are formally closed.

Technical support interactions have been moderate in volume, primarily relating to API rate configuration and user provisioning workflows. No severity-one incidents have been logged against this account during the current contract period. The client's technical team has been responsive to security advisories and has applied critical patches within the recommended remediation windows.
