Account History & Compliance Notes

Reference: EU-B-B1-000302 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The licensing relationship was established as part of a broader enterprise agreement covering multiple subsidiaries. The DigiDigital entity was carved out as a standalone license holder at the request of their group legal counsel, who sought to isolate liability at the operating entity level rather than the holding company. This structure required additional KYC documentation and a supplementary counterparty risk assessment.

Review of the access logs indicated consistent usage during standard business hours in the declared jurisdiction, with no anomalous off-hours activity detected. The IP binding configuration was verified as correctly matching the declared address ranges, and no sessions originating from unexpected geographic locations were identified during the monitoring window.

The account is subject to an enterprise pricing agreement that was last formally benchmarked against market rates in 2023. Given the client's growth trajectory and changes in the competitive landscape, a commercial review has been flagged as a priority item for the next account management planning cycle.

No material concerns are currently flagged for this account. Standard renewal processing is recommended. The account manager has been advised to use the upcoming renewal engagement as an opportunity to discuss the client's forward roadmap and assess scope for appropriate expansion of the licensed services.
