Software Version	10.60.59
IP Address Bound	192.109.239.41

— Continued (Section 4) —

MAC Address Bound	3E:8B:04:47:B7:91
Department	HR
Approved By	Mary Martin
Approval Date	2020-05-07
SLA Level	Platinum
Uptime Guarantee (%)	99.0
Support Hours	24x7
Support Language	French
Data Residency	EU + UK
Cross-Border Transfer	Restricted
Encryption Standard	AES-128-GCM
Audit Frequency	Quarterly

Last Audit Date	2023-12-30
Audit Result	*Pass with Observations*
Renewal Frequency	Quarterly
Auto-Renew	No
Cancellation Notice (Days)	30
CE Marking	N/A
Environmental Compliance	WEEE
Notes	N/A
Internal Reference	REF-11760
Hash Signature	6280b9eaee559f05ce90668e11274a03

Account History & Compliance Notes

Reference: EU-A-A5-000214 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

Initial contact was made through the regional sales team following attendance at an industry conference. The prospect expressed specific interest in the analytics module, and the license scope was deliberately narrowed during negotiations to exclude certain data export functionalities that raised regulatory concerns in the client's jurisdiction. Legal sign-off from the client's privacy counsel was a condition precedent to execution.

Internal telemetry data reviewed under the technical audit clause showed that the software was being accessed from departmental units not originally specified in the license schedule. While the total user count remained within contractual limits, the undisclosed departmental deployment was documented in the compliance memorandum dated 2025-01-21 but not formally escalated given the overall low-risk profile of the account.

While the overall audit outcome was satisfactory, the review panel noted that several recommended security hardening measures from the previous cycle had not been fully implemented. The client attributed the delay to an internal IT resource constraint arising from a parallel infrastructure migration. A revised implementation timeline was accepted and is subject to verification at the next scheduled review.

From a technical standpoint, the deployment has been stable with no major service incidents reported to the support function. The client completed the mandatory security configuration review within the required timeframe and holds a current penetration test certificate on file. Integration with their existing identity management infrastructure was completed without material issues.
