Account History & Compliance Notes

Reference: EU-B-B2-000370 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The account was originally onboarded through a referral from an existing enterprise client, following a competitive procurement process in which three other vendors were evaluated. The initial engagement was preceded by a four-month pilot programme limited to the compliance team, during which the licensee demonstrated satisfactory technical integration capabilities and a genuine commitment to compliance onboarding requirements.

Usage logs obtained during the Q3 2024 compliance review indicated that the integration layer was being accessed by a third-party contractor engaged by LogicCorp, which was not disclosed as a permitted sub-user in the original agreement. The client was notified via formal letter and subsequently provided written confirmation that the contractor access had been terminated and access credentials revoked.

The compliance committee has recommended that the next renewal cycle incorporate a requirement for the client to designate a dedicated internal compliance liaison with defined responsibilities for this account. This expectation has been communicated informally to the client's legal team and received a positive initial response.

While the overall audit outcome was satisfactory, the review panel noted that several recommended security hardening measures from the previous cycle had not been fully implemented. The client attributed the delay to an internal IT resource constraint arising from a parallel infrastructure migration. A revised implementation timeline was accepted and is subject to verification at the next scheduled review.
