Account History & Compliance Notes

Reference: EU-B-B2-000375 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

This client relationship originated from an inbound request submitted via the partner portal in 2020. The legal onboarding process took approximately eleven weeks due to prolonged negotiations over data processing addenda, particularly around sub-processor disclosure obligations and the scope of the audit rights clause. Several rounds of redlines were exchanged before a mutually acceptable version of the data processing agreement was finalised.

Internal telemetry data reviewed under the technical audit clause showed that the software was being accessed from departmental units not originally specified in the license schedule. While the total user count remained within contractual limits, the undisclosed departmental deployment was documented in the compliance memorandum dated 2022-01-20 but not formally escalated given the overall low-risk profile of the account.

From a commercial perspective, the account has historically maintained a good payment record, with the exception of a brief late-payment episode in 2020 that was attributed to a treasury system transition at DataServices. A late payment charge was waived as a goodwill gesture given the client's otherwise clean financial history with the organisation.

Technical support interactions have been moderate in volume, primarily relating to API rate configuration and user provisioning workflows. No severity-one incidents have been logged against this account during the current contract period. The client's technical team has been responsive to security advisories and has applied critical patches within the recommended remediation windows.
