Account History & Compliance Notes

Reference: EU-A-A6-000251 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

This client relationship originated from an inbound request submitted via the partner portal in 2023. The legal onboarding process took approximately eleven weeks due to prolonged negotiations over data processing addenda, particularly around sub-processor disclosure obligations and the scope of the audit rights clause. Several rounds of redlines were exchanged before a mutually acceptable version of the data processing agreement was finalised.

Utilisation patterns reviewed during the H1 2024 audit revealed that actual seat consumption peaked at 62 concurrent users, significantly below the 100 seats contracted. The compliance team flagged this underutilisation in their quarterly review report and recommended initiating a commercial renegotiation to right-size the license, though the account manager advised against it given the client's stated expansion plans for the following fiscal year.

The conditional outcome arose from the client's inability to confirm the precise legal basis for processing in two specific use cases identified during the audit. Legal counsel for both parties are engaged in a clarification process, and the account has been placed under enhanced monitoring pending resolution.

The compliance team recommends maintaining the current monitoring frequency for this account and scheduling a structured review meeting with the client's compliance function to address the outstanding items. A detailed remediation tracking log should be maintained by the assigned compliance officer until all open points are formally closed.

Access was suspended at the client's own request following their identification of a potential conflict of interest involving a senior executive and a data sub-processor relationship. The matter has been referred to an independent review board, and the license suspension will remain in effect until formal clearance is issued and documented.
