Account History & Compliance Notes

Reference: EU-B-B2-000380 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The account was migrated from a legacy reseller arrangement in 2019 when the original distribution partner ceased operations. The transition was managed by the regional partner success team and involved re-signing the master license agreement with updated data processing terms. Several weeks of parallel access were provided to allow the client to verify continuity of service before the legacy arrangement was formally terminated.

Usage logs obtained during the Q3 2024 compliance review indicated that the integration layer was being accessed by a third-party contractor engaged by LogicHub, which was not disclosed as a permitted sub-user in the original agreement. The client was notified via formal letter and subsequently provided written confirmation that the contractor access had been terminated and access credentials revoked.

From a technical standpoint, the deployment has been stable with no major service incidents reported to the support function. The client completed the mandatory security configuration review within the required timeframe and holds a current penetration test certificate on file. Integration with their existing identity management infrastructure was completed without material issues.

The compliance team recommends maintaining the current monitoring frequency for this account and scheduling a structured review meeting with the client's compliance function to address the outstanding items. A detailed remediation tracking log should be maintained by the assigned compliance officer until all open points are formally closed.
