Account History & Compliance Notes

Reference: EU-B-B4-000451 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The licensing relationship was established as part of a broader enterprise agreement covering multiple subsidiaries. The DigiSolutions entity was carved out as a standalone license holder at the request of their group legal counsel, who sought to isolate liability at the operating entity level rather than the holding company. This structure required additional KYC documentation and a supplementary counterparty risk assessment.

Review of the access logs indicated consistent usage during standard business hours in the declared jurisdiction, with no anomalous off-hours activity detected. The IP binding configuration was verified as correctly matching the declared address ranges, and no sessions originating from unexpected geographic locations were identified during the monitoring window.

The software deployment is operating on a version that is approaching end-of-support status. The client has been formally notified and has indicated an intention to plan the upgrade within the next scheduled maintenance window. This item is tracked in the account risk register and will be verified at the next scheduled technical check-in.

The license was formally revoked following the client's failure to cure material breaches identified across successive audit cycles. The decision was made by the Regional Compliance Committee after a final review meeting in which DigiSolutions's legal representative was given the opportunity to present mitigating circumstances. The committee determined that the accumulated non-conformances, combined with the absence of a credible remediation roadmap, warranted revocation rather than a further suspension period.
