Account History & Compliance Notes

Reference: EU-B-B6-000558 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The account was migrated from a legacy reseller arrangement in 2020 when the original distribution partner ceased operations. The transition was managed by the regional partner success team and involved re-signing the master license agreement with updated data processing terms. Several weeks of parallel access were provided to allow the client to verify continuity of service before the legacy arrangement was formally terminated.

Usage logs obtained during the H1 2024 compliance review indicated that the integration layer was being accessed by a third-party contractor engaged by CyberLabs, which was not disclosed as a permitted sub-user in the original agreement. The client was notified via formal letter and subsequently provided written confirmation that the contractor access had been terminated and access credentials revoked.

The account was placed under formal review following information received through internal compliance channels raising concerns about potential use of the licensed data outside the agreed scope. The allegations are being investigated by the compliance integrity team, and access has been restricted to read-only mode pending the outcome. CyberLabs has cooperated fully with all document and information requests to date.

A major audit failure was recorded following the discovery that CyberLabs had been processing data in a jurisdiction not covered by the approved data residency declaration. The transfer was traced to a misconfigured cloud storage configuration that had been routing backup snapshots outside the agreed perimeter since 2020-06-20. The incident was self-reported by the client's IT security team, which was noted as a mitigating factor, though the materiality of the breach required escalation to senior compliance leadership.
