Hash Signature	8ff334d3a4d09255a1f42ec72aa2565b

Account History & Compliance Notes

Reference: EU-B-B6-000564 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

Initial contact was made through the regional sales team following attendance at an industry conference. The prospect expressed specific interest in the analytics module, and the license scope was deliberately narrowed during negotiations to exclude certain data export functionalities that raised regulatory concerns in the client's jurisdiction. Legal sign-off from the client's privacy counsel was a condition precedent to execution.

Usage logs obtained during the Q3 2024 compliance review indicated that the integration layer was being accessed by a third-party contractor engaged by VertexPlatform, which was not disclosed as a permitted sub-user in the original agreement. The client was notified via formal letter and subsequently provided written confirmation that the contractor access had been terminated and access credentials revoked.

The audit concluded with a pass rating subject to three observations. First, the incident response plan had not been updated to reflect recent organisational changes. Second, training records for two staff members with elevated system access could not be produced on request. Third, the annual penetration test report was overdue at the time of the audit. The client acknowledged all three observations and submitted a corrective action plan within the required timeframe.

Expiry of this license followed a deliberate and communicated decision by VertexPlatform to consolidate their technology stack as part of an enterprise-wide cost reduction programme. A formal notice of non-renewal was received in writing from their executive team on 2022-04-22. The account was closed in good standing with all outstanding financial obligations settled prior to the expiry date.

From a commercial perspective, the account has historically maintained a good payment record, with the exception of a brief late-payment episode in 2023 that was attributed to a treasury system transition at VertexPlatform. A late payment charge was waived as a goodwill gesture given the client's otherwise clean financial history with the organisation.
