Account History & Compliance Notes

Reference: US-A-A1-000042 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

This client relationship originated from an inbound request submitted via the partner portal in 2024. The legal onboarding process took approximately eleven weeks due to prolonged negotiations over data processing addenda, particularly around sub-processor disclosure obligations and the scope of the audit rights clause. Several rounds of redlines were exchanged before a mutually acceptable version of the data processing agreement was finalised.

Internal telemetry data reviewed under the technical audit clause showed that the software was being accessed from departmental units not originally specified in the license schedule. While the total user count remained within contractual limits, the undisclosed departmental deployment was documented in the compliance memorandum dated 2023-03-26 but not formally escalated given the overall low-risk profile of the account.

From a technical standpoint, the deployment has been stable with no major service incidents reported to the support function. The client completed the mandatory security configuration review within the required timeframe and holds a current penetration test certificate on file. Integration with their existing identity management infrastructure was completed without material issues.

From a commercial perspective, the account has historically maintained a good payment record, with the exception of a brief late-payment episode in 2024 that was attributed to a treasury system transition at InfoPartners. A late payment charge was waived as a goodwill gesture given the client's otherwise clean financial history with the organisation.

The compliance committee has recommended that the next renewal cycle incorporate a requirement for the client to designate a dedicated internal compliance liaison with defined responsibilities for this account. This expectation has been communicated informally to the client's legal team and received a positive initial response.
