MAC Address Bound	07:34:69:B3:A3:8A	Department	Marketing	Approved By	Dorothy Harris
Approval Date	2024-10-25				

US-A-A2-000084

Revoked | p.6/7

SLA Level	Bronze	Uptime Guarantee (%)	99.0	Support Hours	16x7
Data Classification	Public	Encryption Required	TLS 1.3	Audit Frequency	Monthly
Renewal Frequency	Semi-Annual				

Auto-Renew	No	Cancellation Notice (Days)	30	Notes	Partner referral
Internal Reference	REF-47128	Hash Signature	579b333a3498f5306cd5bf9dd49c6977		

Account History & Compliance Notes

Reference: US-A-A2-000084 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The licensing relationship was established as part of a broader enterprise agreement covering multiple subsidiaries. The AlphaLabs entity was carved out as a standalone license holder at the request of their group legal counsel, who sought to isolate liability at the operating entity level rather than the holding company. This structure required additional KYC documentation and a supplementary counterparty risk assessment.

Utilisation patterns reviewed during the annual 2023 audit revealed that actual seat consumption peaked at 198 concurrent users, significantly below the 500 seats contracted. The compliance team flagged this underutilisation in their quarterly review report and recommended initiating a commercial renegotiation to right-size the license, though the account manager advised against it given the client's stated expansion plans for the following fiscal year.

From a commercial perspective, the account has historically maintained a good payment record, with the exception of a brief late-payment episode in 2019 that was attributed to a treasury system transition at AlphaLabs. A late payment charge was waived as a goodwill gesture given the client's otherwise clean financial history with the organisation.

From a technical standpoint, the deployment has been stable with no major service incidents reported to the support function. The client completed the mandatory security configuration review within the required timeframe and holds a current penetration test certificate on file. Integration with their existing identity management infrastructure was completed without material issues.

The license was formally revoked following the client's failure to cure material breaches identified across successive audit cycles. The decision was made by the Regional Compliance Committee after a final review meeting in which AlphaLabs's legal representative was given the opportunity to present mitigating circumstances. The committee determined that the accumulated non-conformances, combined with the absence of a credible remediation roadmap, warranted revocation rather than a further suspension period.
