Account History & Compliance Notes

Reference: EU-B-B3-000416 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

This client relationship originated from an inbound request submitted via the partner portal in 2019. The legal onboarding process took approximately eleven weeks due to prolonged negotiations over data processing addenda, particularly around sub-processor disclosure obligations and the scope of the audit rights clause. Several rounds of redlines were exchanged before a mutually acceptable version of the data processing agreement was finalised.

Utilisation patterns reviewed during the Q3 2024 audit revealed that actual seat consumption peaked at 196 concurrent users, significantly below the 250 seats contracted. The compliance team flagged this underutilisation in their quarterly review report and recommended initiating a commercial renegotiation to right-size the license, though the account manager advised against it given the client's stated expansion plans for the following fiscal year.

Minor non-conformances identified during the most recent review included out-of-date contact information in the legal notice register and a delay in notifying the compliance team of a personnel change in the data protection function. Neither issue was considered material in isolation, but the recurrence of administrative lapses across multiple audit cycles has been formally noted as a concern.

Access was suspended at the client's own request following their identification of a potential conflict of interest involving a senior executive and a data sub-processor relationship. The matter has been referred to an independent review board, and the license suspension will remain in effect until formal clearance is issued and documented.
