Account History & Compliance Notes

Reference: EU-B-B3-000446 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The account was originally onboarded through a referral from a channel partner, following a competitive procurement process in which three other vendors were evaluated. The initial engagement was preceded by a four-month pilot programme limited to the product team, during which the licensee demonstrated satisfactory technical integration capabilities and a genuine commitment to compliance onboarding requirements.

Review of the access logs indicated consistent usage during standard business hours in the declared jurisdiction, with no anomalous off-hours activity detected. The IP binding configuration was verified as correctly matching the declared address ranges, and no sessions originating from unexpected geographic locations were identified during the monitoring window.

The software deployment is operating on a version that is approaching end-of-support status. The client has been formally notified and has indicated an intention to plan the upgrade within the next scheduled maintenance window. This item is tracked in the account risk register and will be verified at the next scheduled technical check-in.

The account is subject to an enterprise pricing agreement that was last formally benchmarked against market rates in 2024. Given the client's growth trajectory and changes in the competitive landscape, a commercial review has been flagged as a priority item for the next account management planning cycle.
