Account History & Compliance Notes

Reference: EU-B-B4-000452 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The licensing relationship was established as part of a broader enterprise agreement covering multiple subsidiaries. The QuantumDynamics entity was carved out as a standalone license holder at the request of their group legal counsel, who sought to isolate liability at the operating entity level rather than the holding company. This structure required additional KYC documentation and a supplementary counterparty risk assessment.

The finance team has been the primary user base since initial deployment, with occasional cross-departmental access granted on an ad-hoc basis by the client's internal IT administrator. The compliance team has repeatedly noted the absence of a formal internal user provisioning process at the client side, which creates tracking difficulties and was cited as a control weakness in the last two consecutive audit cycles.

The compliance committee has recommended that the next renewal cycle incorporate a requirement for the client to designate a dedicated internal compliance liaison with defined responsibilities for this account. This expectation has been communicated informally to the client's legal team and received a positive initial response.

A major audit failure was recorded following the discovery that QuantumDynamics had been processing data in a jurisdiction not covered by the approved data residency declaration. The transfer was traced to a misconfigured cloud storage configuration that had been routing backup snapshots outside the agreed perimeter since 2024-09-15. The incident was self-reported by the client's IT security team, which was noted as a mitigating factor, though the materiality of the breach required escalation to senior compliance leadership.
