Account History & Compliance Notes

Reference: EU-B-B4-000453 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

This client relationship originated from an inbound request submitted via the partner portal in 2019. The legal onboarding process took approximately eleven weeks due to prolonged negotiations over data processing addenda, particularly around sub-processor disclosure obligations and the scope of the audit rights clause. Several rounds of redlines were exchanged before a mutually acceptable version of the data processing agreement was finalised.

Internal telemetry data reviewed under the technical audit clause showed that the software was being accessed from departmental units not originally specified in the license schedule. While the total user count remained within contractual limits, the undisclosed departmental deployment was documented in the compliance memorandum dated 2025-08-05 but not formally escalated given the overall low-risk profile of the account.

Based on the account history and current risk profile, the recommendation is to proceed with renewal subject to the inclusion of enhanced audit rights provisions and a requirement for quarterly self-attestation reporting. The commercial team has been briefed on these conditions.

Minor non-conformances identified during the most recent review included out-of-date contact information in the legal notice register and a delay in notifying the compliance team of a personnel change in the data protection function. Neither issue was considered material in isolation, but the recurrence of administrative lapses across multiple audit cycles has been formally noted as a concern.
