Account History & Compliance Notes

Reference: EU-B-B4-000489 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The account was originally onboarded through a referral from an industry peer, following a competitive procurement process in which three other vendors were evaluated. The initial engagement was preceded by a four-month pilot programme limited to the it team, during which the licensee demonstrated satisfactory technical integration capabilities and a genuine commitment to compliance onboarding requirements.

Internal telemetry data reviewed under the technical audit clause showed that the software was being accessed from departmental units not originally specified in the license schedule. While the total user count remained within contractual limits, the undisclosed departmental deployment was documented in the compliance memorandum dated 2023-03-13 but not formally escalated given the overall low-risk profile of the account.

The account is subject to an enterprise pricing agreement that was last formally benchmarked against market rates in 2019. Given the client's growth trajectory and changes in the competitive landscape, a commercial review has been flagged as a priority item for the next account management planning cycle.

From a technical standpoint, the deployment has been stable with no major service incidents reported to the support function. The client completed the mandatory security configuration review within the required timeframe and holds a current penetration test certificate on file. Integration with their existing identity management infrastructure was completed without material issues.

The most recent audit returned a minor failure rating primarily due to incomplete documentation of the sub-processor register. Several vendors listed in the client's data processing agreements were absent from the register submitted to the compliance portal, a discrepancy attributed to an administrative oversight during a recent procurement cycle. The client committed to remediation and provided an updated register within the stipulated timeframe.
