Account History & Compliance Notes

Reference: EU-B-B5-000504 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The account was originally onboarded through a referral from an existing enterprise client, following a competitive procurement process in which three other vendors were evaluated. The initial engagement was preceded by a four-month pilot programme limited to the compliance team, during which the licensee demonstrated satisfactory technical integration capabilities and a genuine commitment to compliance onboarding requirements.

Review of the access logs indicated consistent usage during standard business hours in the declared jurisdiction, with no anomalous off-hours activity detected. The IP binding configuration was verified as correctly matching the declared address ranges, and no sessions originating from unexpected geographic locations were identified during the monitoring window.

The pricing structure for this account reflects a negotiated discount agreed in exchange for a multi-year commitment and the client's participation as a reference customer. The commercial terms are subject to a utilisation-linked review mechanism that was included at the client's request during the original negotiation.

The software deployment is operating on a version that is approaching end-of-support status. The client has been formally notified and has indicated an intention to plan the upgrade within the next scheduled maintenance window. This item is tracked in the account risk register and will be verified at the next scheduled technical check-in.
