Account History & Compliance Notes

Reference: US-A-A6-000332 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The account was originally onboarded through a referral from a channel partner, following a competitive procurement process in which three other vendors were evaluated. The initial engagement was preceded by a four-month pilot programme limited to the r&d team, during which the licensee demonstrated satisfactory technical integration capabilities and a genuine commitment to compliance onboarding requirements.

Usage logs obtained during the annual 2023 compliance review indicated that the integration layer was being accessed by a third-party contractor engaged by CyberDigital, which was not disclosed as a permitted sub-user in the original agreement. The client was notified via formal letter and subsequently provided written confirmation that the contractor access had been terminated and access credentials revoked.

Expiry of this license followed a deliberate and communicated decision by CyberDigital to consolidate their technology stack as part of an enterprise-wide cost reduction programme. A formal notice of non-renewal was received in writing from their executive team on 2020-08-22. The account was closed in good standing with all outstanding financial obligations settled prior to the expiry date.

No material concerns are currently flagged for this account. Standard renewal processing is recommended. The account manager has been advised to use the upcoming renewal engagement as an opportunity to discuss the client's forward roadmap and assess scope for appropriate expansion of the licensed services.
