Account History & Compliance Notes

Reference: US-B-B3-000497 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The account was migrated from a legacy reseller arrangement in 2019 when the original distribution partner ceased operations. The transition was managed by the regional partner success team and involved re-signing the master license agreement with updated data processing terms. Several weeks of parallel access were provided to allow the client to verify continuity of service before the legacy arrangement was formally terminated.

The design team has been the primary user base since initial deployment, with occasional cross-departmental access granted on an ad-hoc basis by the client's internal IT administrator. The compliance team has repeatedly noted the absence of a formal internal user provisioning process at the client side, which creates tracking difficulties and was cited as a control weakness in the last two consecutive audit cycles.

Given the pattern of recurring minor non-conformances, the account has been designated for an enhanced compliance engagement programme for the next review period. This will involve increased audit frequency and mandatory participation in compliance briefings provided to the client's relevant staff.

The license was formally revoked following the client's failure to cure material breaches identified across successive audit cycles. The decision was made by the Regional Compliance Committee after a final review meeting in which TechSystems's legal representative was given the opportunity to present mitigating circumstances. The committee determined that the accumulated non-conformances, combined with the absence of a credible remediation roadmap, warranted revocation rather than a further suspension period.

The account is subject to an enterprise pricing agreement that was last formally benchmarked against market rates in 2019. Given the client's growth trajectory and changes in the competitive landscape, a commercial review has been flagged as a priority item for the next account management planning cycle.
