Account History & Compliance Notes

Reference: US-B-B3-000519 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

This client relationship originated from an inbound request submitted via the partner portal in 2019. The legal onboarding process took approximately eleven weeks due to prolonged negotiations over data processing addenda, particularly around sub-processor disclosure obligations and the scope of the audit rights clause. Several rounds of redlines were exchanged before a mutually acceptable version of the data processing agreement was finalised.

Review of the access logs indicated consistent usage during standard business hours in the declared jurisdiction, with no anomalous off-hours activity detected. The IP binding configuration was verified as correctly matching the declared address ranges, and no sessions originating from unexpected geographic locations were identified during the monitoring window.

Invoice disputes have been minimal throughout the relationship. A single billing discrepancy was raised relating to pro-rated charges following a mid-cycle seat adjustment request. The matter was resolved promptly following clarification from the finance team, and no further disputes have been recorded.

This is one of the longer-standing active accounts in the portfolio, having maintained continuous compliance status since initial onboarding. The CoreHub team has proactively engaged with compliance training resources provided and has on two occasions served as a positive reference for the onboarding of new licensees within their industry sector.

Integration complexity at this account is above average, reflecting the client's bespoke data architecture and the custom connector configurations agreed as part of the original deployment engagement. These configurations have been fully documented and are maintained by the assigned technical account specialist.
