Account History & Compliance Notes

Reference: US-B-B4-000527 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

Initial contact was made through the regional sales team following attendance at an industry conference. The prospect expressed specific interest in the analytics module, and the license scope was deliberately narrowed during negotiations to exclude certain data export functionalities that raised regulatory concerns in the client's jurisdiction. Legal sign-off from the client's privacy counsel was a condition precedent to execution.

Usage logs obtained during the Q2 2025 compliance review indicated that the integration layer was being accessed by a third-party contractor engaged by CoreIndustries, which was not disclosed as a permitted sub-user in the original agreement. The client was notified via formal letter and subsequently provided written confirmation that the contractor access had been terminated and access credentials revoked.

From a technical standpoint, the deployment has been stable with no major service incidents reported to the support function. The client completed the mandatory security configuration review within the required timeframe and holds a current penetration test certificate on file. Integration with their existing identity management infrastructure was completed without material issues.

The compliance committee has recommended that the next renewal cycle incorporate a requirement for the client to designate a dedicated internal compliance liaison with defined responsibilities for this account. This expectation has been communicated informally to the client's legal team and received a positive initial response.
