Renewal Frequency	Semi-Annual
Auto-Renew	Yes
Cancellation Notice (Days)	120
Notes	Legacy system migration
Internal Reference	REF-58559
Hash Signature	142a81aa5d25fa90b3c0110f828f90c0

Account History & Compliance Notes

Reference: US-A-A3-000119 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The account was originally onboarded through a referral from a trade association contact, following a competitive procurement process in which three other vendors were evaluated. The initial engagement was preceded by a four-month pilot programme limited to the r&d team, during which the licensee demonstrated satisfactory technical integration capabilities and a genuine commitment to compliance onboarding requirements.

Review of the access logs indicated consistent usage during standard business hours in the declared jurisdiction, with no anomalous off-hours activity detected. The IP binding configuration was verified as correctly matching the declared address ranges, and no sessions originating from unexpected geographic locations were identified during the monitoring window.

The compliance committee has recommended that the next renewal cycle incorporate a requirement for the client to designate a dedicated internal compliance liaison with defined responsibilities for this account. This expectation has been communicated informally to the client's legal team and received a positive initial response.

From a commercial perspective, the account has historically maintained a good payment record, with the exception of a brief late-payment episode in 2024 that was attributed to a treasury system transition at CloudDigital. A late payment charge was waived as a goodwill gesture given the client's otherwise clean financial history with the organisation.

The review status was triggered by a routine screening process that identified a potential exposure risk associated with a recent change in CloudDigital's beneficial ownership structure. The compliance team is working with external legal counsel to assess the materiality of the situation and determine whether continued licensing is permissible under applicable regulatory requirements.
