Account History & Compliance Notes

Reference: US-A-A3-000131 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The account was originally onboarded through a referral from a trade association contact, following a competitive procurement process in which three other vendors were evaluated. The initial engagement was preceded by a four-month pilot programme limited to the product team, during which the licensee demonstrated satisfactory technical integration capabilities and a genuine commitment to compliance onboarding requirements.

Usage logs obtained during the Q1 2024 compliance review indicated that the integration layer was being accessed by a third-party contractor engaged by OmegaServices, which was not disclosed as a permitted sub-user in the original agreement. The client was notified via formal letter and subsequently provided written confirmation that the contractor access had been terminated and access credentials revoked.

The review status was triggered by a routine screening process that identified a potential exposure risk associated with a recent change in OmegaServices's beneficial ownership structure. The compliance team is working with external legal counsel to assess the materiality of the situation and determine whether continued licensing is permissible under applicable regulatory requirements.

From a commercial perspective, the account has historically maintained a good payment record, with the exception of a brief late-payment episode in 2020 that was attributed to a treasury system transition at OmegaServices. A late payment charge was waived as a goodwill gesture given the client's otherwise clean financial history with the organisation.
