Hash Signature	1ed973f8af86749f85553bf528d6e70b

Account History & Compliance Notes

Reference: US-B-B4-000574 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The account was originally onboarded through a referral from a channel partner, following a competitive procurement process in which three other vendors were evaluated. The initial engagement was preceded by a four-month pilot programme limited to the compliance team, during which the licensee demonstrated satisfactory technical integration capabilities and a genuine commitment to compliance onboarding requirements.

Usage logs obtained during the annual 2023 compliance review indicated that the integration layer was being accessed by a third-party contractor engaged by VertexConsulting, which was not disclosed as a permitted sub-user in the original agreement. The client was notified via formal letter and subsequently provided written confirmation that the contractor access had been terminated and access credentials revoked.

Integration complexity at this account is above average, reflecting the client's bespoke data architecture and the custom connector configurations agreed as part of the original deployment engagement. These configurations have been fully documented and are maintained by the assigned technical account specialist.

From a commercial perspective, the account has historically maintained a good payment record, with the exception of a brief late-payment episode in 2023 that was attributed to a treasury system transition at VertexConsulting. A late payment charge was waived as a goodwill gesture given the client's otherwise clean financial history with the organisation.
