Account History & Compliance Notes

Reference: US-A-A3-000166 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The account was originally onboarded through a referral from an industry peer, following a competitive procurement process in which three other vendors were evaluated. The initial engagement was preceded by a four-month pilot programme limited to the r&d team, during which the licensee demonstrated satisfactory technical integration capabilities and a genuine commitment to compliance onboarding requirements.

Internal telemetry data reviewed under the technical audit clause showed that the software was being accessed from departmental units not originally specified in the license schedule. While the total user count remained within contractual limits, the undisclosed departmental deployment was documented in the compliance memorandum dated 2020-10-14 but not formally escalated given the overall low-risk profile of the account.

From a commercial perspective, the account has historically maintained a good payment record, with the exception of a brief late-payment episode in 2024 that was attributed to a treasury system transition at CoreDynamics. A late payment charge was waived as a goodwill gesture given the client's otherwise clean financial history with the organisation.

The compliance team recommends maintaining the current monitoring frequency for this account and scheduling a structured review meeting with the client's compliance function to address the outstanding items. A detailed remediation tracking log should be maintained by the assigned compliance officer until all open points are formally closed.
