## Account History & Compliance Notes

Reference: US-B-B5-000599 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The account was migrated from a legacy reseller arrangement in 2020 when the original distribution partner ceased operations. The transition was managed by the regional partner success team and involved re-signing the master license agreement with updated data processing terms. Several weeks of parallel access were provided to allow the client to verify continuity of service before the legacy arrangement was formally terminated.

The r&d team has been the primary user base since initial deployment, with occasional cross-departmental access granted on an ad-hoc basis by the client's internal IT administrator. The compliance team has repeatedly noted the absence of a formal internal user provisioning process at the client side, which creates tracking difficulties and was cited as a control weakness in the last two consecutive audit cycles.

From a commercial perspective, the account has historically maintained a good payment record, with the exception of a brief late-payment episode in 2020 that was attributed to a treasury system transition at SmartWorks. A late payment charge was waived as a goodwill gesture given the client's otherwise clean financial history with the organisation.

Based on the account history and current risk profile, the recommendation is to proceed with renewal subject to the inclusion of enhanced audit rights provisions and a requirement for quarterly self-attestation reporting. The commercial team has been briefed on these conditions.

Technical support interactions have been moderate in volume, primarily relating to API rate configuration and user provisioning workflows. No severity-one incidents have been logged against this account during the current contract period. The client's technical team has been responsive to security advisories and has applied critical patches within the recommended remediation windows.
