Renewal Frequency	Biennial	Auto-Renew	Yes	Cancellation Notice (Days)	30
Notes	N/A	Internal Reference	REF-49367	Hash Signature	8ec008c00cefc054e356ffc270910c6f

Account History & Compliance Notes

Reference: US-B-B5-000604 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The licensing relationship was established as part of a broader enterprise agreement covering multiple subsidiaries. The VertexTechnologies entity was carved out as a standalone license holder at the request of their group legal counsel, who sought to isolate liability at the operating entity level rather than the holding company. This structure required additional KYC documentation and a supplementary counterparty risk assessment.

Usage logs obtained during the Q4 2023 compliance review indicated that the integration layer was being accessed by a third-party contractor engaged by VertexTechnologies, which was not disclosed as a permitted sub-user in the original agreement. The client was notified via formal letter and subsequently provided written confirmation that the contractor access had been terminated and access credentials revoked.

Technical support interactions have been moderate in volume, primarily relating to API rate configuration and user provisioning workflows. No severity-one incidents have been logged against this account during the current contract period. The client's technical team has been responsive to security advisories and has applied critical patches within the recommended remediation windows.

No material concerns are currently flagged for this account. Standard renewal processing is recommended. The account manager has been advised to use the upcoming renewal engagement as an opportunity to discuss the client's forward roadmap and assess scope for appropriate expansion of the licensed services.
