Account History & Compliance Notes

Reference: US-B-B5-000611 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The licensing relationship was established as part of a broader enterprise agreement covering multiple subsidiaries. The OmegaDynamics entity was carved out as a standalone license holder at the request of their group legal counsel, who sought to isolate liability at the operating entity level rather than the holding company. This structure required additional KYC documentation and a supplementary counterparty risk assessment.

Internal telemetry data reviewed under the technical audit clause showed that the software was being accessed from departmental units not originally specified in the license schedule. While the total user count remained within contractual limits, the undisclosed departmental deployment was documented in the compliance memorandum dated 2023-11-14 but not formally escalated given the overall low-risk profile of the account.

From a technical standpoint, the deployment has been stable with no major service incidents reported to the support function. The client completed the mandatory security configuration review within the required timeframe and holds a current penetration test certificate on file. Integration with their existing identity management infrastructure was completed without material issues.

The account was placed under formal review following information received through internal compliance channels raising concerns about potential use of the licensed data outside the agreed scope. The allegations are being investigated by the compliance integrity team, and access has been restricted to read-only mode pending the outcome. OmegaDynamics has cooperated fully with all document and information requests to date.

Based on the account history and current risk profile, the recommendation is to proceed with renewal subject to the inclusion of enhanced audit rights provisions and a requirement for quarterly self-attestation reporting. The commercial team has been briefed on these conditions.
