MAC Address Bound	1F:50:B3:A6:37:70

— Continued (Section 5) —

Department	Design
Approved By	Sandra Garcia
Approval Date	2019-03-25
SLA Level	Gold
Uptime Guarantee (%)	99.0
Support Hours	8x5
Data Classification	Confidential
Encryption Required	TLS 1.3

— Continued (Section 6) —

Audit Frequency	Quarterly
Renewal Frequency	Quarterly
Auto-Renew	Yes
Cancellation Notice (Days)	120
Notes	Volume discount applied
Internal Reference	REF-89260
Hash Signature	4e28cc162b69b181554d6fa1ed4cf033

Account History & Compliance Notes

Reference: US-A-A6-000330 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

Initial contact was made through the regional sales team following attendance at an industry conference. The prospect expressed specific interest in the analytics module, and the license scope was deliberately narrowed during negotiations to exclude certain data export functionalities that raised regulatory concerns in the client's jurisdiction. Legal sign-off from the client's privacy counsel was a condition precedent to execution.

The design team has been the primary user base since initial deployment, with occasional cross-departmental access granted on an ad-hoc basis by the client's internal IT administrator. The compliance team has repeatedly noted the absence of a formal internal user provisioning process at the client side, which creates tracking difficulties and was cited as a control weakness in the last two consecutive audit cycles.

Given the pattern of recurring minor non-conformances, the account has been designated for an enhanced compliance engagement programme for the next review period. This will involve increased audit frequency and mandatory participation in compliance briefings provided to the client's relevant staff.

The pricing structure for this account reflects a negotiated discount agreed in exchange for a multi-year commitment and the client's participation as a reference customer. The commercial terms are subject to a utilisation-linked review mechanism that was included at the client's request during the original negotiation.

The software deployment is operating on a version that is approaching end-of-support status. The client has been formally notified and has indicated an intention to plan the upgrade within the next scheduled maintenance window. This item is tracked in the account risk register and will be verified at the next scheduled technical check-in.
