## Account History & Compliance Notes

Reference: US-C-C4-000903 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The account was migrated from a legacy reseller arrangement in 2024 when the original distribution partner ceased operations. The transition was managed by the regional partner success team and involved re-signing the master license agreement with updated data processing terms. Several weeks of parallel access were provided to allow the client to verify continuity of service before the legacy arrangement was formally terminated.

The compliance team has been the primary user base since initial deployment, with occasional cross-departmental access granted on an ad-hoc basis by the client's internal IT administrator. The compliance team has repeatedly noted the absence of a formal internal user provisioning process at the client side, which creates tracking difficulties and was cited as a control weakness in the last two consecutive audit cycles.

No material concerns are currently flagged for this account. Standard renewal processing is recommended. The account manager has been advised to use the upcoming renewal engagement as an opportunity to discuss the client's forward roadmap and assess scope for appropriate expansion of the licensed services.

Access was suspended at the client's own request following their identification of a potential conflict of interest involving a senior executive and a data sub-processor relationship. The matter has been referred to an independent review board, and the license suspension will remain in effect until formal clearance is issued and documented.

Integration complexity at this account is above average, reflecting the client's bespoke data architecture and the custom connector configurations agreed as part of the original deployment engagement. These configurations have been fully documented and are maintained by the assigned technical account specialist.
