## Account History & Compliance Notes

Reference: US-B-B1-000406 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

Initial contact was made through the regional sales team following attendance at an industry conference. The prospect expressed specific interest in the analytics module, and the license scope was deliberately narrowed during negotiations to exclude certain data export functionalities that raised regulatory concerns in the client's jurisdiction. Legal sign-off from the client's privacy counsel was a condition precedent to execution.

Utilisation patterns reviewed during the Q2 2025 audit revealed that actual seat consumption peaked at 2 concurrent users, significantly below the 5 seats contracted. The compliance team flagged this underutilisation in their quarterly review report and recommended initiating a commercial renegotiation to right-size the license, though the account manager advised against it given the client's stated expansion plans for the following fiscal year.

Given the pattern of recurring minor non-conformances, the account has been designated for an enhanced compliance engagement programme for the next review period. This will involve increased audit frequency and mandatory participation in compliance briefings provided to the client's relevant staff.

Technical support interactions have been moderate in volume, primarily relating to API rate configuration and user provisioning workflows. No severity-one incidents have been logged against this account during the current contract period. The client's technical team has been responsive to security advisories and has applied critical patches within the recommended remediation windows.

Access was suspended at the client's own request following their identification of a potential conflict of interest involving a senior executive and a data sub-processor relationship. The matter has been referred to an independent review board, and the license suspension will remain in effect until formal clearance is issued and documented.
