Account History & Compliance Notes

Reference: US-B-B2-000450 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The account was originally onboarded through a referral from an existing enterprise client, following a competitive procurement process in which three other vendors were evaluated. The initial engagement was preceded by a four-month pilot programme limited to the executive team, during which the licensee demonstrated satisfactory technical integration capabilities and a genuine commitment to compliance onboarding requirements.

Utilisation patterns reviewed during the H1 2024 audit revealed that actual seat consumption peaked at 54 concurrent users, significantly below the 100 seats contracted. The compliance team flagged this underutilisation in their quarterly review report and recommended initiating a commercial renegotiation to right-size the license, though the account manager advised against it given the client's stated expansion plans for the following fiscal year.

The account is currently in good standing with no open compliance matters. The most recent annual review concluded with a fully satisfactory outcome, and the client has consistently demonstrated a cooperative and proactive posture during all audit engagements. The relationship is considered low-maintenance from a compliance oversight perspective.

From a technical standpoint, the deployment has been stable with no major service incidents reported to the support function. The client completed the mandatory security configuration review within the required timeframe and holds a current penetration test certificate on file. Integration with their existing identity management infrastructure was completed without material issues.

The account is subject to an enterprise pricing agreement that was last formally benchmarked against market rates in 2024. Given the client's growth trajectory and changes in the competitive landscape, a commercial review has been flagged as a priority item for the next account management planning cycle.
