Account History & Compliance Notes

Reference: US-B-B2-000466 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

This client relationship originated from an inbound request submitted via the partner portal in 2023. The legal onboarding process took approximately eleven weeks due to prolonged negotiations over data processing addenda, particularly around sub-processor disclosure obligations and the scope of the audit rights clause. Several rounds of redlines were exchanged before a mutually acceptable version of the data processing agreement was finalised.

Usage logs obtained during the Q3 2024 compliance review indicated that the integration layer was being accessed by a third-party contractor engaged by AlphaCorp, which was not disclosed as a permitted sub-user in the original agreement. The client was notified via formal letter and subsequently provided written confirmation that the contractor access had been terminated and access credentials revoked.

The license reached its contractual expiry date without renewal, despite three formal renewal notices issued at 90, 60, and 30 days prior to expiry. Internal records indicate that the client's procurement team initiated a renewal process but encountered internal budget approval delays that could not be resolved within the required timeframe. Post-expiry access has been blocked per standard operational procedure.

Technical support interactions have been moderate in volume, primarily relating to API rate configuration and user provisioning workflows. No severity-one incidents have been logged against this account during the current contract period. The client's technical team has been responsive to security advisories and has applied critical patches within the recommended remediation windows.
