Account History & Compliance Notes

Reference: US-D-D3-001197 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The licensing relationship was established as part of a broader enterprise agreement covering multiple subsidiaries. The CyberSolutions entity was carved out as a standalone license holder at the request of their group legal counsel, who sought to isolate liability at the operating entity level rather than the holding company. This structure required additional KYC documentation and a supplementary counterparty risk assessment.

Review of the access logs indicated consistent usage during standard business hours in the declared jurisdiction, with no anomalous off-hours activity detected. The IP binding configuration was verified as correctly matching the declared address ranges, and no sessions originating from unexpected geographic locations were identified during the monitoring window.

Integration complexity at this account is above average, reflecting the client's bespoke data architecture and the custom connector configurations agreed as part of the original deployment engagement. These configurations have been fully documented and are maintained by the assigned technical account specialist.

The account was placed under formal review following information received through internal compliance channels raising concerns about potential use of the licensed data outside the agreed scope. The allegations are being investigated by the compliance integrity team, and access has been restricted to read-only mode pending the outcome. CyberSolutions has cooperated fully with all document and information requests to date.

Invoice disputes have been minimal throughout the relationship. A single billing discrepancy was raised relating to pro-rated charges following a mid-cycle seat adjustment request. The matter was resolved promptly following clarification from the finance team, and no further disputes have been recorded.
