Account History & Compliance Notes

Reference: US-D-D4-001238 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The licensing relationship was established as part of a broader enterprise agreement covering multiple subsidiaries. The CyberLabs entity was carved out as a standalone license holder at the request of their group legal counsel, who sought to isolate liability at the operating entity level rather than the holding company. This structure required additional KYC documentation and a supplementary counterparty risk assessment.

Utilisation patterns reviewed during the annual 2023 audit revealed that actual seat consumption peaked at 1 concurrent users, significantly below the 1 seats contracted. The compliance team flagged this underutilisation in their quarterly review report and recommended initiating a commercial renegotiation to right-size the license, though the account manager advised against it given the client's stated expansion plans for the following fiscal year.

The license was formally revoked following the client's failure to cure material breaches identified across successive audit cycles. The decision was made by the Regional Compliance Committee after a final review meeting in which CyberLabs's legal representative was given the opportunity to present mitigating circumstances. The committee determined that the accumulated non-conformances, combined with the absence of a credible remediation roadmap, warranted revocation rather than a further suspension period.

From a technical standpoint, the deployment has been stable with no major service incidents reported to the support function. The client completed the mandatory security configuration review within the required timeframe and holds a current penetration test certificate on file. Integration with their existing identity management infrastructure was completed without material issues.

From a commercial perspective, the account has historically maintained a good payment record, with the exception of a brief late-payment episode in 2024 that was attributed to a treasury system transition at CyberLabs. A late payment charge was waived as a goodwill gesture given the client's otherwise clean financial history with the organisation.
