Account History & Compliance Notes

Reference: US-B-B4-000544 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

Initial contact was made through the regional sales team following attendance at an industry conference. The prospect expressed specific interest in the analytics module, and the license scope was deliberately narrowed during negotiations to exclude certain data export functionalities that raised regulatory concerns in the client's jurisdiction. Legal sign-off from the client's privacy counsel was a condition precedent to execution.

Review of the access logs indicated consistent usage during standard business hours in the declared jurisdiction, with no anomalous off-hours activity detected. The IP binding configuration was verified as correctly matching the declared address ranges, and no sessions originating from unexpected geographic locations were identified during the monitoring window.

Integration complexity at this account is above average, reflecting the client's bespoke data architecture and the custom connector configurations agreed as part of the original deployment engagement. These configurations have been fully documented and are maintained by the assigned technical account specialist.

The renewal process was initiated within the contractual notice window, but negotiations have been extended due to SysCorp's request for modified terms including expanded data residency provisions and a reduction in the minimum seat commitment threshold. Commercial discussions are ongoing, and the account has been extended on a month-to-month basis at the existing contractual rate pending execution of the renewal agreement.
