Account History & Compliance Notes

Reference: US-D-D4-001279 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The account was originally onboarded through a referral from a direct inbound inquiry, following a competitive procurement process in which three other vendors were evaluated. The initial engagement was preceded by a four-month pilot programme limited to the compliance team, during which the licensee demonstrated satisfactory technical integration capabilities and a genuine commitment to compliance onboarding requirements.

The compliance team has been the primary user base since initial deployment, with occasional cross-departmental access granted on an ad-hoc basis by the client's internal IT administrator. The compliance team has repeatedly noted the absence of a formal internal user provisioning process at the client side, which creates tracking difficulties and was cited as a control weakness in the last two consecutive audit cycles.

No material concerns are currently flagged for this account. Standard renewal processing is recommended. The account manager has been advised to use the upcoming renewal engagement as an opportunity to discuss the client's forward roadmap and assess scope for appropriate expansion of the licensed services.

The current suspension was imposed as a precautionary measure pending the outcome of an internal investigation at TechGlobal following an incident involving a key user with elevated system privileges. The suspension was agreed mutually with the client's legal team as a risk containment measure and is expected to be lifted subject to satisfactory resolution and formal sign-off from the compliance committee.
