## Account History & Compliance Notes

Reference: US-D-D5-001334 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The licensing relationship was established as part of a broader enterprise agreement covering multiple subsidiaries. The AlphaHub entity was carved out as a standalone license holder at the request of their group legal counsel, who sought to isolate liability at the operating entity level rather than the holding company. This structure required additional KYC documentation and a supplementary counterparty risk assessment.

Usage logs obtained during the Q1 2024 compliance review indicated that the integration layer was being accessed by a third-party contractor engaged by AlphaHub, which was not disclosed as a permitted sub-user in the original agreement. The client was notified via formal letter and subsequently provided written confirmation that the contractor access had been terminated and access credentials revoked.

Revocation was triggered by persistent non-payment of invoices outstanding beyond the contractual grace period, compounded by the discovery during a routine compliance check that the software continued to be operated without authorisation. The account was placed on a legal hold status concurrently with the revocation notice, pending assessment of potential damages and recovery options.

From a commercial perspective, the account has historically maintained a good payment record, with the exception of a brief late-payment episode in 2019 that was attributed to a treasury system transition at AlphaHub. A late payment charge was waived as a goodwill gesture given the client's otherwise clean financial history with the organisation.
