Account History & Compliance Notes

Reference: US-B-B6-000672 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The account was migrated from a legacy reseller arrangement in 2024 when the original distribution partner ceased operations. The transition was managed by the regional partner success team and involved re-signing the master license agreement with updated data processing terms. Several weeks of parallel access were provided to allow the client to verify continuity of service before the legacy arrangement was formally terminated.

Review of the access logs indicated consistent usage during standard business hours in the declared jurisdiction, with no anomalous off-hours activity detected. The IP binding configuration was verified as correctly matching the declared address ranges, and no sessions originating from unexpected geographic locations were identified during the monitoring window.

From a commercial perspective, the account has historically maintained a good payment record, with the exception of a brief late-payment episode in 2024 that was attributed to a treasury system transition at ApexAnalytics. A late payment charge was waived as a goodwill gesture given the client's otherwise clean financial history with the organisation.

Renewal documentation is currently in the final legal review stage. The delay has been attributed to an internal organisational restructuring that resulted in the departure of the original contract owner, requiring a newly appointed responsible manager to complete a full review of the existing terms before authorising execution.
