Account History & Compliance Notes

Reference: US-C-C1-000736 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The account was migrated from a legacy reseller arrangement in 2021 when the original distribution partner ceased operations. The transition was managed by the regional partner success team and involved re-signing the master license agreement with updated data processing terms. Several weeks of parallel access were provided to allow the client to verify continuity of service before the legacy arrangement was formally terminated.

The design team has been the primary user base since initial deployment, with occasional cross-departmental access granted on an ad-hoc basis by the client's internal IT administrator. The compliance team has repeatedly noted the absence of a formal internal user provisioning process at the client side, which creates tracking difficulties and was cited as a control weakness in the last two consecutive audit cycles.

The account was placed under formal review following information received through internal compliance channels raising concerns about potential use of the licensed data outside the agreed scope. The allegations are being investigated by the compliance integrity team, and access has been restricted to read-only mode pending the outcome. DigiWorks has cooperated fully with all document and information requests to date.

The compliance team recommends maintaining the current monitoring frequency for this account and scheduling a structured review meeting with the client's compliance function to address the outstanding items. A detailed remediation tracking log should be maintained by the assigned compliance officer until all open points are formally closed.
